from the bestselling award winning author of 1491 and 1493 an incisive portrait of the two little known twentieth century scientists norman borlaug and william vogt whose diametrically opposed views shaped our ideas about the environment laying the groundwork for how people in the twenty first century will choose to live in tomorrow s world in forty years earth s population will reach ten billion can our world support that what kind of world will it be those answering these questions generally fall into two deeply divided groups wizards and prophets as charles mann calls them in this balanced authoritative nonpolemical new book the prophets he explains follow william vogt a founding environmentalist who believed that in using more than our planet has to give our prosperity will lead us to ruin cut back was his mantra otherwise everyone will lose the wizards are the heirs of norman borlaug whose research in effect wrangled the world in

service to our species to produce modern high yield crops that then saved millions from starvation innovate was borlaug s cry only in that way can everyone win mann delves into these diverging viewpoints to assess the four great challenges humanity faces food water energy climate change grounding each in historical context and weighing the options for the future with our civilization on the line the author s insightful analysis is an essential addition to the urgent conversation about how our children will fare on an increasingly crowded earth

from virtually the onset of its independence in the early nineteenth century chile took a superior attitude toward its racially mixed and less organized neighbors this stance was not unlike that of another young republic in the hemisphere the united states with their relatively stable governments and prosperous economies the two countries claimed amoral right to impose their will on nearby nations given this shared imperial impulse it is not surprising that they became rivals in chile and the united states the third volume to appear in the series the united states and the americas william f sater traces the often stormy course of u s chilean relations covering not only policy decisions but also the overall political cultural and economic developments that formed the context in which those policies unfolded as sater explains the chileans initially believed that they could triumph in the event of a clash with the americans because of their superior moral commitment and willingness to endure sacrifice unintimidated by the size of the united states chile found its sense of mission bolstered by the american government s inconsistent enforcement of the monroe doctrine and grudging acceptance of chilean dominance over peru and bolivia yet sater shows by the end of the nineteenth century chile had to face reality its organizational skills could no longer compensate for a limited population and resource base worse just as both the united states and chile s neighbor argentina became wealthier and more populous chile sank into a political morass that paralyzed its ability to govern itself once the premier power of the pacific it fell to second rate status a fact that nevertheless did little to mitigate the chileans sense of cultural superiority in the early twentieth century sater notes chile scored several economic and diplomatic victories over the united states and after world war ii resorted to various new doctrines and strategies in hopes of regaining its lost glory when the efforts of strongmen failed chileans turned to christian democracy socialism and finally military rule none of which succeeded in restoring the country s political unity and self esteem yet sater contends rather than accept that geopolitical and economic realities had limited their nation s place in the world chileans blamed the united states for whatever ills befell them even as they continued to expect american aid for its part the united states insisted that chile accept its counsel in order to receive u s economic assistance this frustrating standoff sater shows is but the latest phase of a contentious relationship nearly two centuries in the making that shows no ready signs of disappearing
