the energy used to operate buildings is one of the most significant sources of greenhouse gas emissions to lessen the human impact on

climate it is necessary to reduce these building related emissions new legislation as well as market and financial pressures are driving architects and developers to create low carbon buildings while it is possible to achieve many of these reductions through appropriate climate responsive design many architects are not trained to do this filling an urgent need for a design reference in this emerging field carbon neutral architectural design describes how to reduce building related greenhouse gas emissions through appropriate design techniques this full color book presents strategies and methods to achieve co2 reductions with an emphasis on control of energy flows through the building envelope and passive heating and cooling strategies strategies for designing buildings with a smaller carbon footprint examining climate change and its relationship with buildings the book begins with a look at the sources of emissions and how these are produced as a result of interactions between buildings and the surrounding environment it then introduces a carbon neutral architectural design process cndp and a roadmap that can be adjusted for different types of projects discussing climate analysis and solar geometry the book explores how understanding the climate where a building is located helps to identify the design strategies that are best suited to that location whether warm and humid warm and dry temperate or cold it looks at psychrometrics and how to achieve thermal comfort with minimum emissions the book also explains how building fabric can be used to control energy flows by conduction radiation and convection helping to reduce overheating and overcooling and how to incorporate passive cooling and heating systems through appropriate design the book includes useful references equations and illustrations as well as a comparison of free carbon counting tools that can be used for residential building design drawing on the author s extensive experience in teaching and practice this is a valuable resource for anyone who wants to reduce the carbon footprint of buildings find more study resources at the american institute of architects carbon neutral design project web site what s next for green building see what dr la roche has to say in this video on the hmc architects blog

now it is possible for the first time to trace in a systematic way the language patterns of one of the greatest poets who have written in english w b yeats like a concordance to the poems of matthew arnold the first of the cornell concordances that are under the general editorship of professor parrish this volume was produced on an ibm 704 electronic data processing machine computer technique has so advanced that the yeats concordance includes punctuation and gives cross references for the second parts of hyphenated words the frequency of every word in yeats s poems is given and an appendix lists all indexed words in order of frequency the body of this book consists of an index of all significant words in yeats each word listed in the line or lines in which it occurs the concordance is based on the variorum text of yeats edited by alspach and allt and includes all variants that occur in printed versions of yeats s poems
